About Our Manufacturer

Dessian Products is based in Belfast and has grown to become one of the most reputable PVCu fabricators in the UK and Ireland over the past 40 years. Using only world renowned REHAU profile, Dessian manufactures all of its products to high levels of quality and durability, achieving BSI Kitemark Standards BS 7412 and PAS24 across its product range.

For more information visit: dessian.co.uk

Profile Systems

Our windows and doors come in two systems:

- *REHAU TOTAL70C (70mm chamfered)*
- *REHAU TOTAL70S (sculptured)*

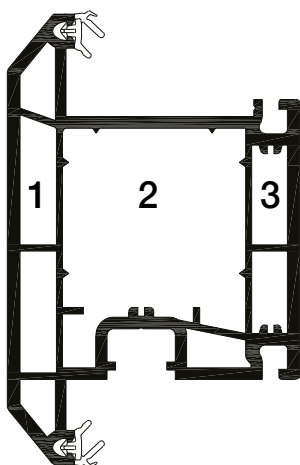

Each type of system is multi-chambered depending upon the specification required. The more chambers, the more thermally efficient the product.

Fabricator Accreditations

3 Chamber Profiles

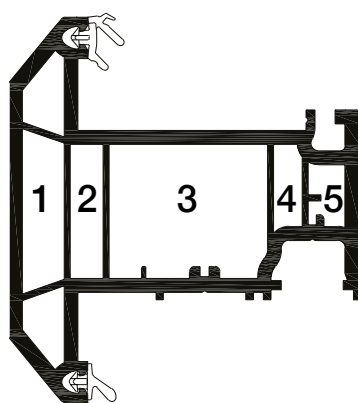

- Tilt and Turn sash
- Door sash
- Transom

Secured By Design

Secured by Design (SBD) is a police initiative aimed at reducing crimes in homes by installing products which meet police-approved standards that provide an appropriate level of resistance to criminal attack.

Dessian can supply the following products with SBD certification:

- REHAU TOTAL70C Casement Windows including Fixed Lights
- REHAU TOTAL70S Casement Windows including Fixed Lights
- TOTAL70C and TOTAL70S Tilt and Turns
- REHAU TOTAL70R
- REHAU TOTAL70C and TOTAL70S Residential Doors and French Doors
- REHAU Sliding Door

*Research shows that residents living on Secured By Design developments are half as likely to be burgled.

Colours

All of our windows and doors are available in White as standard but also come in a range of foil colours and woodgrains. Often customers specify White on the inside and a colour on the outside to reflect traditional wooden frames. Colour options will vary depending on the product you are buying so please speak to a Sales Manager for more details. A current summary is provided below:

Standard Window and Door Colours

- REHAU TOTAL70C (70mm)**

Knifed

A-Rated Windows

Choosing the right replacement windows can help to make your home more energy efficient and can reduce your heating bills. Our frames are manufactured to British Fenestration Ratings Council (BFRC) energy ratings A, B or C when combined with the appropriate glass.

Triple Glazing

Dessian also supplies frames suitable for triple glazing. When combined with the correct glass and reinforcing specification, a whole window U-value of 0.8W/m²K can be achieved (windows only).

U Value / WER Calculator

REHAU has developed an Online Thermal Calculator to demonstrate the energy efficiency of their windows and doors. It works by calculating thermal transmittance or "U-Values" by following the principles of BS EN ISO 10077-1.

We recommend this tool to provide indicative WER ratings for retail customers. The program allows the user to print the calculation graphic to show whether a particular window achieves an A, B or C rating and also facilitates the personalisation of customer quotations.

Window Styles

Choose from our modern range of window styles:

- Casement Windows
- French Windows
- Tilt and Turn Windows
- Fully Reversible Windows
- Bay and Bow Windows
- Arched or Angled Windows
- Sash Horn Windows
- Flush Fit Windows

Casement Windows

Casement windows are the most popular window type and can be designed to suit any type of property. They come in a wide variety of configurations including fixed, top or side openers and offer superior insulation and security.

French Windows

French windows have all the same great features as casement windows but with a much larger opening area to really bring the outdoors inside. They also provide a stylish solution to fire escape regulations when required.

Tilt and Turn Windows

Twist the handle half way to tilt inwards or twist fully to open like a door, these dual functioning windows are versatile and easy to operate. If required this window can be used as a fire escape.

Fully Reversible Windows

Fully Reversible windows are extremely practical, especially for tall buildings as they can be turned right around, enabling the glass to be cleaned on both sides. To aid safety, there is a restrictor system which prevents the window from opening too wide.

Bay and Bow Windows

Bay and Bow windows add another dimension to your home, allowing more space and light. Our windows are made to your specific requirements depending, on the size and shape of the area you wish to create.

Arched and Angled Windows

Arched and Angled windows are often used in extensions or custom built houses to add a touch of modern sophistication to the home. A wide range of shapes can be made in all our colours according to your specific requirements.

Sash Horn Windows

We also offer an alternative to the sliding sash window. The run-through Sash Horn window opens outwards like a casement window whilst imitating the classic look of a sash window when closed.

Available only in the TOTAL70C system.

Flush Fit Windows

REHAU's Rio Flush Fit windows are fast becoming a contemporary alternative to casements. They are characterised by openers that close flush with frame. Flush Fit windows are ideal for customers who want to replicate timber windows whilst benefitting from the durability, security and energy efficiency of uPVC.

Window Locks

Dessian supply a comprehensive range of window locking systems to reduce the chance of intrusions, helping homeowners to feel safe in their home.

Standard Espagnolette

All windows come with this lock as standard which has multiple locking points to achieve a high standard of security.

Shootbolt option (high security option)

Shootbolts extend outwards from the top and bottom of the window holding it tight to the frame and increasing security.

Twin Cam Espag (high security option)

This provides an extra level of security with the addition of another locking point. Its "pinching" movement secures both lock points into the keep.

Window Handle Colours

An extensive range of handles is on offer to suit your home and personal taste.

Door Styles

Choose from our contemporary range of doors:

- Residential Doors
- French Doors
- Patio/Sliding Doors
- Stable Doors
- Aluminium Bi-folding Doors

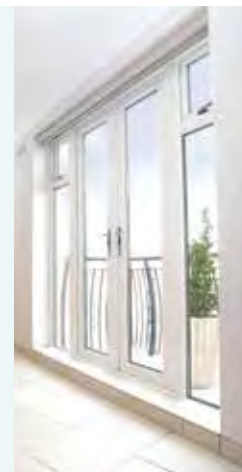

Residential Doors

Your front door will immediately add kerb appeal and value to your home. Our striking range of front and back PVCu residential doors are fully compatible with REHAU window styles, ensuring a high quality and consistent finish throughout your whole home. There is an extensive range of colours, finishes and hardware as well as the latest performance handles, hinges and locking mechanisms to make your door stylish and secure.

French Doors

French doors are double opening, allowing homeowners to enjoy their outdoor space like an extension to their home. Even when closed they allow in more light and offer enhanced views of the surrounding area. Our doors come with double handles as standard as well as shootbolt locks with the option to upgrade to hook locks if required.

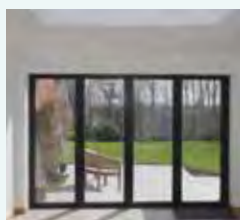

Sliding Patio Doors

The REHAU sliding door is perfect for modern living. Its versatile and stylish design includes slim sightlines which let in more natural light and creates a feeling of spaciousness. These highly desirable doors are extremely smooth running, with outstanding aesthetic appeal and security. They are available in a variety of styles from 2 - 4 panes as well as double track systems.

Stable Doors

Stable doors provide a charming entrance to the home and their style makes them ideal for cottages, terraces and older properties with character. Our stable doors offer a tilt and turn system on the top half. A wide choice of colours, door furniture and locks are available.

Aluminium Bi-Folding Doors

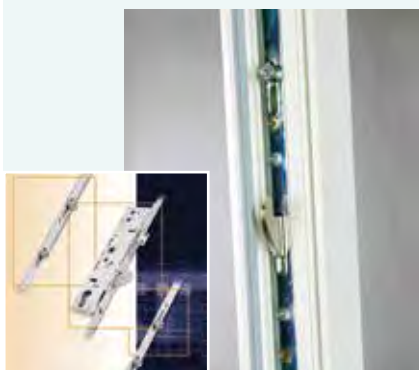

Aluminium Bi-folding doors allow uninterrupted views by folding back and providing a wide opening to your garden. They fold to minimise lost space and their unique design ensures smooth opening and closing. Security is taken care of with shoot bolt locking and single point handles. Our bi-folding doors are weather tested to BS 6775, Part 1 PAS24 tested and Document Q compliant.

Door Security

Security on all our doors is a priority to help make your home safe and secure. Our range of locking options is summarised below.

Standard 1 Hook 4 Roller

All doors come with this lock as standard. It includes bi-directional roller locks and one deadlock hook in the centre for anti-separation resistance.

3 Hook 4 Roller (high security option)

This lock is designed to meet the requirements of PAS24 and is licenced by Secured by Design. It has 4 bi-directional locking rollers as well as 3 deadlock hooks to make it highly secure.

French Door Locks

On our range of French doors, both sashes have shootbolt locking top and bottom. These doors will also come with a 1 Hook 4 Roller lock as standard or it can be upgraded to 3 Hook 4 Roller if required.

Door Hinges

We supply a 3D security flag hinge which comes in the following colours as standard.

Our range:

- White
- Black
- Cream
- Satin Silver
- Silver
- Gold
- Tan
- Anthracite Grey
- Dark Brown

Anthracite Grey Hinge

Door Handle Colours

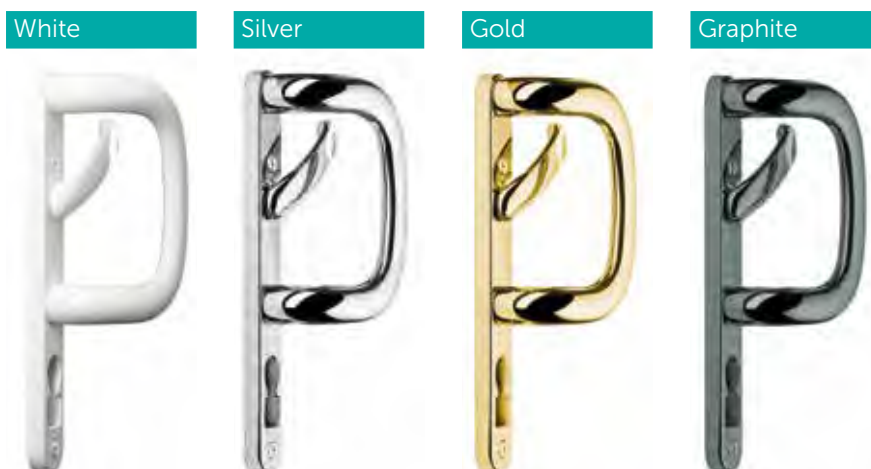

Residential Door Handle Colours

We supply a range of colours in door handles to complement every door type.

Patio Door Handle Colours

The Rehau sliding door comes with easy to operate D-handles in the following colours:

Door Thresholds

Door thresholds run across the bottom of the door frame and are an important factor in the energy efficiency of a building. We supply a range of door threshold options in a variety of colours:

Our range:

- 52mm (standard colours)*
- 62mm*
- 72mm*
- 15mm REHAU Aluminium low threshold (Gold and Silver)
- Stormguard Aluminium low threshold (Gold and Silver) with detachable ramp.

62mm threshold in Black

62mm threshold in Grey on White

REHAU Aluminium Low Threshold in Gold

Stormguard Threshold in Gold

* 52mm available in White, Grey, Grey on White, Black and Black on White.

* 62mm and 72mm available in all colours.
